

Let's heal mother earth together through the Arts for our future generations to inherit a peaceful and healthy past.

The next versions of #docutopia will be an opportunity for 'climate heroes', agricultural and artistic producers, policy-makers, co-developers, co-financers and especially the youth, with a long term perspective to cocreate the steps for the Metaverse into the Multiverse.

It will include eco*social/justice & share~care #gaMeAPartS

- PEOPLE2PEOPLE #dos as regional possibility towards an equality of currencies

- multiple additional/individual

^natural/ecological

^cultural/artistic

^professional

^private/public

^solidary

^political (#wikelecta)

*map-layers ...where offers and needs are matchable directly.

I would be very thankful for this stArt up to work towards symbiotic synergy solutions with you and your networks worldwide. If you would like to invest and water the seeds through cocreation, please contact me via +4915124641211.

Sincerely yours

Bôba Mènde

A little more about DOCUTOPIA

It's on the way to become an ecosocial, interactive sculpture, a #maplication platform and develops into an open-source, super-app with multiple layers and solutions to solve as many SDG's as possible together with prosumers as "ecoheros", what we all can be. It's *subnatural vision is to invite people to go from the metaverse into the multiverse, back on the ground of mother eARTh, to it's springs, rivers, forests, seas and so on, to take care of it, map it and share knowledges about it and even organize together for everyone's benefit.

Another substancial ingredient of docutopia's multiverse will be the consensus tool #wikelecta to have a transparent way of law/policy co-creation, a people-proofed polls and petition integration to start/process regional and multi-/ supra- national decisions within public hands from being born onwards. The live and work conditions of people in the community are going to be improved, because of the self-governance part of docutopia's #wikelecta all are invited to get involved via direct votes, polls to co-create laws, legislations, policies and to decide decentral and sovereign together with their region where they live.

It's potential long-term outcome in the form of a cash card with an unconditional basic income, free housing as well as free healthcare self-generated through mapping and co-creation of sustainable projects and products in circular production ways is a big vision of docutopia as reality will be partly shaped by this digital multitool too.

Ambitious without a natural status, only being a "non-place" and still an utopian dream as it sounds like, maybe one day it will guide the way to transparent currencies equality combined with peace/re and up-cycling progress protocols including QR, NFTs, IDIs & free visas. A people-proofed passport will hopefully bring peace, justice and equality for humans, children, animals, labor, water and landrights through one people's world agreement. This would be an achievement I am dreaming about for our planet to come and that is why I am spending my time co-creating, spreading the word and producing art about it. I would love to be a part of the next evolutionary step of humanity from the digital information age into a multiversal peacycling era with free education, healthcare & visa, UBI, transparent economical, self-governed structures for future generations to walk proudly in our footsteps. If docutopia as a multimap, is getting integrated as well by as many other, already existing social, professional, and ecological networks as possible, it has the potential to make everyone's voices heard, recognized and visible, if they choose to join the multiverse.

Together reconstructing & growing communities into a paradise of healthy nature with individual freedom of choice, veto power & direct consensual decisions regiobally from all for all. An equal, peaceful, healthy and natural people's habitat is going to be reality one day. Docutopia's next version is going live in may 2024....Nama_pste 1mproduction.com 2024
