

This is an invitation for you to be pArt of #docutopia's *multiverse; an interactive, eco-social, mapping-sculpture, upcoming game, feature film, market place and tool.

It gives multiple possibilities co-creating with artists and especially young people, to go from the meta- into the #multiverse, where offers and needs match directly on the map itself already today. You are able to cartographically do events, profiles and places; make them and yourself visible and self-editable. Please don't hesitate to add your pins onto this *subnatural, grass-root-artwork.

Try it's basic functions via docutopia.de and be a pArt of our beta-test version via next.docutopia.dehappy mApping!
